

”

xSentio Redmine provides us with everything we need. It's simple to appreciate, easy to use and gives us a better control of our projects. I really value the fact that I can operate a project remotely, even from my mobile phone.

– Cattis Bragman, Comet Consular Services

## The road to full control starts with a powerful project tool

xSentio Redmine is a project management service with no cool buzzwords and features that you pay for but never use. With an elegant and easy-to-use user interface that works with all major browsers, you are up and running 30 minutes after signing up for a subscription.

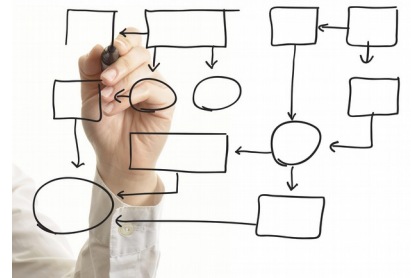

### See the overview

- Roadmap
- Gantt chart
- Calendar
- Customisable views

### Take control

- Permission management
- Time reporting
- Categorizations
- Reports and summaries

### Reach the same goals

- News with commentary fields
- Discussion forums
- Wiki with a search function
- Version goals

## Why choose xSentio Redmine for your projects?

- No installation, log in and you are on your way
- Your account is always accessible and safe with us
- We run regular backups of your account
- Personal and competent support to help you at all times
